Curated Scan Report

- Run: `sanity`
- Reports dir: `reports/`

Summary

- Consolidated findings: **2**
- PoCs discovered (compact): **1**

---

sqli-error — `https://example.com`

- **Severity:** 4
- **Occurrences merged:** 1
- **PoCs:** *none attached*
- **Examples / notes:**
  - (no compact excerpt available)
- **Recommended remediation (high level):**
  - Use parameterized queries / prepared statements. Validate and escape inputs. Review DB permissions.

---

xss-error — `https://example.com`

- **Severity:** 2
- **Occurrences merged:** 1
- **PoCs (1):**
  - `https://example.com` — status: `error`
- **Examples / notes:**
  - (no compact excerpt available)
- **Recommended remediation (high level):**
  - Sanitize and encode untrusted input before rendering. Use context-specific encoding (HTML, JS, attribute). Implement CSP.

Mapping diagnostics (auto-generated)

- mapping candidates processed: 1
- unmapped PoCs: 0
